## New CME ECO-BSA Automatic Bag Scale

New CME ECO-BSA open-mouth bag scale with air operated filler and bag holder with easy-slide weight adjust.

Bag scales are commonly used to bag a wide variety of products, including:

- - Seeds/grains
- - Pelleted feed
- - Granules
- - Wood pellets
- - Animal bedding
- - Fertilizers
- - Other free flowing products

This unit is rated at a maximum of 12 bags per minute depending on operator, product and weight. Unit is capable of consistent weights from 15lbs to 125lbs per bag with accuracy of + or - .4lbs. Price includes full manufacturer warranty and manual. Unit requires electrical and pneumatic connections.
